

# BHI-15 SPR

Blackheart International has maximized the BHI-15 rifle platform's long-range accuracy potential with the all-new BHI-15 SPR (Special Purpose Rifle).

Key ingredients begin with the Magpul PRS (Precision Rifle/Sniper) stock, adjustable in both cheek riser height and length-of-pull. Additional ergonomic benefits for long-range shooting include a rubber butt-pad, easy-grip adjustment knobs and a robust butt stock hook for non-shooting hand support.

The next critical point is the DPMS Panther Tactical Grip, boasting an aggressive textured polymer-injected body and adjustable palm grip which ideally positions the shooter's hand for a more direct trigger pull, and provides support to reduce fatigue when waiting for the shot.

Inside the precision billet machined lower receiver is a Geissele DMR (Designated Marksman Rifle) adjustable two-stage trigger for maximum trigger control.

Finally, the already high-accuracy package is further fine-tuned with the inclusion of a 20-inch Criterion barrel and rifle-length gas system. Add in the Leupold Mark AR 3-9x40 scope with mil-dot reticle, Picatinny rail scope mount, hard-chromed bolt carrier group, Titanium firing pin, Gasbuster charging handle and Harris 6- to 9-inch adjustable bipod and you have an AR-style rifle that will satisfy both close-in and long-range tactical requirements for law enforcement, security and sporting needs.

## Precision Long-Range Tactical Short-Range

### BASIC SPECIFICATIONS

<b>Caliber:</b>	5.56mm NATO
<b>Bolt Carrier Group:</b>	Gas-operated semi-auto, hard-chromed
<b>Charging Handle:</b>	PRI Gasbuster
